@SDGSynthesis

The Global SDG Synthesis Coalition

Why synthesis?

- Make sense of the multitude of evidence
- Provide greater confidence, trust the evidence
- Minimize bias based on critical appraisal
- Identify what works to accelerate, how, where and why
- Avoid what does not work
- Generate learning and promote lessons to accelerate the SDGs
- Avoid overstating the efficacy of any one policy or program based on a single example

Why a Coalition?

- To ensure consideration of the multidimensionality of sustainable development
- To integrate the principle of universality
- To ensure the principle of leaving no one behind
- To deliver as one, in a more integrative and harmonized way
- To think systemically and sustainably based on the SDG principles and pillars

Coalition Objectives

Accelerate achievement toward the SDGs through...

Evidence

Robust evidence of
what has worked,
why and where

Insights
